

## Mobile Ordering System QUORION QMOS

The world's slimmest and lightest hand held professional terminal for the hospitality market. With a weight of less than 100 g and a depth of only 9 mm it sets a new standard for hand held devices.

The color TFT display, Bluetooth® wireless long range technology, full touch area and the splash proof and drop resistant design are only a few of the outstanding features.

The embedded software offers all functions you ever wanted for a mobile ordering system. It is easy to use, if desired with just one hand only.

Well defined interfaces allow a quick and easy integration into your existing Quorion POS system.
